

cycle up

cycle-up.eu

Few figures

Construction and public works represent **250 million tonnes** of waste per year.

Source : ADEME - for France

It also represents **70% of waste production** in France.

Source : CGDD

Materials account for **56%** of a building's **carbon impact**.

Source : CSTB - (Centre scientifique et technique du bâtiment)

50% of the waste are not following material recovery (reuse, re-use, recycling).

Source : Ministry of Ecological and Solidarity Transition

Double impact

An impact on projects

Carbon footprint reduction

Reduction of waste disposal

Non-renewable raw materials savings

Lower construction costs

Compliance with regulations and green labels

Positive impact for cities

Less need for waste facilities

Lower imports of raw materials

Construction Supply Relocation

Local jobs creation

Development of social Employment

A community of pioneering partners

Cycle Up intends to develop partnerships and open relation with real estate players. We involve partners in defining functionalities and creating rich and contents. Together, we build dedicated legal and contracting solutions and share technical facts and methodologies.

GRAND PRIX DE L'INNOVATION DIGITALE 2018

Innovation digitale
Bronze Award

Created in march 2018, Cycle Up is an innovation based company specialised in construction circularity. With free access for all professionals, cycle-up.fr has been designed to optimise the match between opportunity and demand of reused materials. The marketplace brings together the real-estate industry: owners, developers, architects, engineers, demolition companies and builders.

Cycle Up intends to stimulate social and territorial development, by offering local businesses and social economy actors the opportunity to become partners in developing dedicated services.

Our services

Engineering and Consultancy

We offer a range of services to support your projects and your teams.

- Program definition
- Resources diagnosis
- Contractual documentation drafting
- Resources monitoring
- Feasibility study
- General consulting
- Feedback and reuse assessment

A tailor-made offer

You can build alone, or with us, an offer tailored to your needs.

- Management on behalf of third parties: putting materials online, sales follow-up, coordination of technical operations on your behalf
- We search for you: let us know your needs and we'll do the research for you
- Additional sales services: delivery, storage, technical tests, design, quality control, etc.

Training and Education

We offer training courses about Reuse of Materials.

- Methodology and key steps in reuse
- Legal and contractual context of re-employment
- Introduction to reuse in architecture
- Re-use process for beginners
- How to use our platform www.cycle-up.eu
